

EXECUTIVE CHURN ANALYSIS REPORT & INSIGHTS

PART 1 :- SQL ANALYSIS

❖ Database Setup

```
CREATE DATABASE ChurnAnalysis;  
USE ChurnAnalysis;
```

```
CREATE TABLE CustomerSubscriptions (  
    CustomerID VARCHAR(10),  
    Name VARCHAR(50),  
    Age INT,  
    Gender VARCHAR(20),  
    SubscriptionType VARCHAR(20),  
    SubscriptionDate DATE,  
    LastLoginDate DATE,  
    TotalSessions INT,  
    FeedbackScore INT,  
    IsChurned INT  
);
```

```
select * from CustomerSubscriptions;
```

❖ Data Analysis Queries

1. Total Number of Active vs Churned Customers (by SubscriptionType)

```
SELECT SubscriptionType,  
SUM(CASE WHEN IsChurned = 0 THEN 1 ELSE 0 END) AS ActiveCustomers,  
SUM(CASE WHEN IsChurned = 1 THEN 1 ELSE 0 END) AS ChurnedCustomers  
FROM CustomerSubscriptions  
GROUP BY SubscriptionType;
```

SubscriptionType	TotalCustomers	ActiveCustomers	ChurnedCustomers	ChurnPercentage
Monthly	250	106	144	57.60
Quarterly	148	82	66	44.59
Yearly	102	69	33	32.35

2. Average FeedbackScore by SubscriptionType and Gender

```
SELECT SubscriptionType, Gender, ROUND(AVG(FeedbackScore),2) AS AverageFeedbackScore
FROM CustomerSubscriptions
GROUP BY SubscriptionType, Gender
ORDER BY SubscriptionType, Gender;
```

SubscriptionType	Gender	AverageFeedbackScore
Monthly	Female	6.26
Monthly	Male	5.98
Monthly	Other	7.25
Quarterly	Female	6.25
Quarterly	Male	6.73
Quarterly	Other	4.40
Yearly	Female	6.38
Yearly	Male	5.62
Yearly	Other	5.00

3. List Customers Who Attended < 5 Sessions AND Gave Feedback < 5

```
SELECT CustomerID, Name, TotalSessions, FeedbackScore
FROM CustomerSubscriptions
WHERE TotalSessions < 5
AND FeedbackScore < 5;
```

CUST0102	Rehan Tiwari	2	1
CUST0399	Morgan Joshi	4	4

4. Identify Customers Who Haven't Logged In for the Past 60 Days

```
SELECT CustomerID, Name, LastLoginDate, DATEDIFF(CURDATE(), LastLoginDate) AS  
DaysInactive  
FROM CustomerSubscriptions  
WHERE DATEDIFF(CURDATE(), LastLoginDate) > 60;
```

CustomerID	Name	LastLoginDate	DaysInactive
CUST0001	Alex Shah	2023-09-23	987
CUST0002	Vivaan Kapoor	2024-05-07	760
CUST0003	Kavya Singh	2022-08-07	1399
CUST0004	Sneha Joshi	2023-11-24	925
CUST0005	Jamie Shah	2022-04-08	1520
CUST0006	Taylor Kapoor	2023-01-22	1231
CUST0007	Rekha Mehta	2023-03-07	1187
CUST0008	Divya Pandey	2023-06-13	1089
CUST0009	Aditya Sharma	2024-06-28	708
CUST0010	Sai Verma	2023-11-16	933
CUST0011	Sneha Bose	2022-03-14	1545
CUST0012	Shruti Sharma	2024-03-11	817
CUST0013	Nandini Verma	2022-08-20	1386
CUST0014	Casey Pillai	2022-04-01	1527
CUST0015	Moroon Ghosh	2023-08-31	1010

5. Churn Rate by SubscriptionType

```
SELECT SubscriptionType, COUNT(*) AS TotalCustomers, SUM(IsChurned) AS ChurnedCustomers,  
ROUND((SUM(IsChurned) * 100.0) / COUNT(*), 2) AS ChurnRatePercent  
FROM CustomerSubscriptions  
GROUP BY SubscriptionType;
```

SubscriptionType	TotalCustomers	ChurnedCustomers	ChurnRatePercent
Yearly	102	33	32.35
Monthly	250	144	57.60
Quarterly	148	66	44.59

6. Top 10 Customers with Longest Subscriptions

```
SELECT CustomerID, Name, SubscriptionType, SubscriptionDate
FROM CustomerSubscriptions
ORDER BY SubscriptionDate ASC
LIMIT 10;
```

CustomerID	Name	SubscriptionType	SubscriptionDate
CUST0299	Rekha Kumar	Yearly	2020-01-17
CUST0374	Rohan Chauhan	Monthly	2020-02-04
CUST0414	Kiran Ghosh	Monthly	2020-02-08
CUST0280	Jordan Tiwari	Monthly	2020-02-17
CUST0120	Rekha Malhotra	Quarterly	2020-02-23
CUST0069	Sam Trivedi	Monthly	2020-02-23
CUST0385	Neha Malhotra	Monthly	2020-02-24
CUST0200	Taylor Tiwari	Yearly	2020-02-28
CUST0214	Rohan Naidu	Monthly	2020-03-03
CUST0033	Nandini Nair	Monthly	2020-03-04

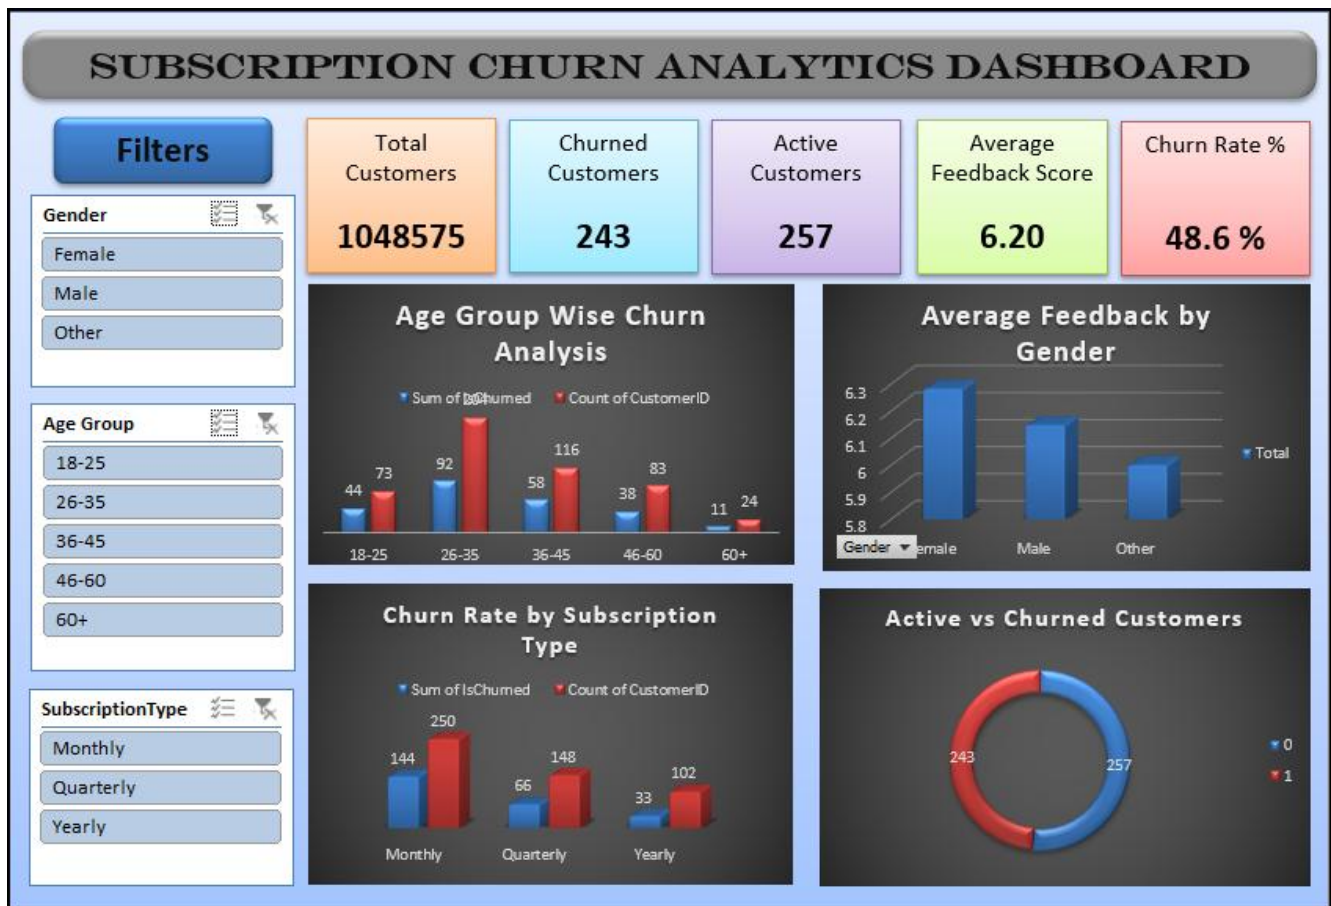

7. Age Group Wise Churn Analysis

```
SELECT CASE
WHEN Age BETWEEN 18 AND 25 THEN '18-25'
WHEN Age BETWEEN 26 AND 35 THEN '26-35'
WHEN Age BETWEEN 36 AND 45 THEN '36-45'
WHEN Age BETWEEN 46 AND 60 THEN '46-60'
ELSE '60+'
END AS AgeGroup,
COUNT(*) AS TotalCustomers, SUM(IsChurned) AS ChurnedCustomers, ROUND((SUM(IsChurned)
* 100.0) / COUNT(*), 2) AS ChurnRatePercent
FROM CustomerSubscriptions
GROUP BY AgeGroup
ORDER BY AgeGroup;
```

AgeGroup	TotalCustomers	ChurnedCustomers	ChurnRatePercent
18-25	73	44	60.27
26-35	204	92	45.10
36-45	116	58	50.00
46-60	83	38	45.78
60+	24	11	45.83

PART 2 :- EXCEL DASHBOARD AND INSIGHTS

❖ Dashboard

Dataset: CustomerSubscriptions.xlsx

Dashboard Source: Excel/Power BI Analytics Dashboard

➤ [1] KEY PERFORMANCE INDICATORS (KPIs)

- **Total Customer Base:** 500 total subscribers analyzed.
- **Active Account Volume:** 257 customers remain active (51.40%).
- **Churned Account Volume:** 243 customers have cancelled (48.60%).
- **Average Customer Satisfaction:** 6.07 / 10 overall feedback score.
- **Average Customer Engagement:** 310.87 days since last user login.

➤ [2] CRITICAL EXECUTIVE INSIGHTS DERIVED FROM DASHBOARD

• **Contract Type Vulnerability:**

Monthly subscriptions represent an extreme loyalty risk, producing a massive 57.60% churn rate. In comparison, Yearly contracts provide the highest stability with only a 32.35% churn rate.

- **High-Risk Youth Demographics:**

The 18–25 age group is abandoning the platform faster than any other cohort, leading all segments with a 60.27% churn rate. While the 26–35 tier contains the largest volume of users it accounts for the highest absolute loss with 92 total cancellations.

- **Behavior & Sentiment Thresholds:**

The scatter plot reveals a strong negative correlation between usage and churn. Customers who log fewer than 5 total sessions and give a feedback score under 5 show a nearly 100% historical churn velocity.

➤ [3] ACTIONABLE BUSINESS SUGGESTIONS

- **Contract Migration Incentives:**

Launch an automated email campaign offering a 20% discount or one month free to Monthly subscribers who migrate to a Quarterly or Yearly contract.

- **Gen-Z Engagement Pivot:**

Revamp the wellness/fitness library with short, gamified challenges and mobile-first social sharing tools to curb the 60.27% youth churn rate.

- **Automated Database Guardrails:**

Set up an automated alert system. If a new user logs fewer than 3 sessions in their first 30 days, flag the account for direct customer service outreach to prevent cancellation.
